## Cardiac Arrest

When a person goes into Cardiac Arrest, [they may only have minutes or seconds to live](#). Cardio Pulmonary Resuscitation (CPR) combined with an Automated External Defibrillator (AED) are tools to save someone in a life or death situation.

## Heartsaver CPR and AED Workplace Training

Total Fire Protection offers a work-place oriented CPR and AED training program. Students will learn how to recognize and respond to a case of Cardiac Arrest and will be instructed on proper CPR technique and AED usage.

### ■ OSHA-Certified

All classes are taught by certified instructors in accordance with OSHA standards.

### ■ Length and Size

Classes are approximately 3 hours long, by appointment only and can consist of 10 to 12 students.
